

Texas Testimonial

A prospective client in Alaska asked to chat with one of our customers for some direct input. These are the comments forwarded from a recent client in Texas.
(Green italics mine.)

“I'm not sure what you needed to know. I did lots of research and kept coming back to their website. I started talking to them in January and they were close to finalizing the new material manufacture. I was the first order of the Camira fabrics. My blinds came late March and we are just now getting them up...

“I really freaked out about how close the measurements had to be and measured several times to make sure I was correct.

“I'm very pleased with our order. We have 10 of the 12 shades up and the room that was so uncomfortable with the heat in the summer and cold in the winter, with the one shade up that gets the brunt of the hot West Sun, there was an ***immediate difference*** in the temperature of the room. With all five windows in the dining room installed the room is very comfortable to be in. It has almost a blackout effect. I have lace swags over the windows as well.

“We were able to leave our (existing) blinds up with the exception of one window.

“I'm also using sheers in other parts of the house and or drapes as wells as blinds and the Roman Shades.

“Our whole house feels cooler due to the shades and my husband likes the almost black out effect.

“Because of the cost I wondered at first if I made the right decision, but after working with Peter and doing my research I was convinced very early on that I was right. The shades have not disappointed me.

“Since I'm not an interior design person I can't say from that aspect. But from a comfort of the room and they look great. ***We as a family made the right decision.***

“I hope this helps.”
