

**Optimum Passive Solar Performance
is best achieved when using a well designed thermal shade.**

You have invested a great deal of time, effort and resources into making sure your home is as efficient as possible.

Yet insulating your windows for heat retention and energy management may have been overlooked simply because you were unaware of your options.

Your walls may be at the recommended R-19, your roof at R-38. But your windows, even if new, still present a hole in your thermal envelope.

**HeatSaver® Thermal Shades can
take care of this problem.
Easily and efficiently.**

All of our shades are **custom manufactured** for each client's specific needs, guaranteeing fit, finish, ease of operation and longevity. With **HeatSaver®** you have the option of choosing the fabric best suited to your needs and tastes.

We have **new lines of recycled polyester** and **hemp fabrics** available, shipped directly to our workroom.

HeatSaver® Thermal Shades. Serious Energy Conservation.
